## PROFESSIONAL SUMMARY

B.Tech Computer Engineering in AIML with a strong foundation in Python, Java, Data Structures and Algorithms, Object-Oriented Programming, SQL, and software development. Hands-on experience building web applications and software projects using Python, Java, MySQL, HTML, CSS, and JavaScript. Familiar with Git, database management, problem-solving, debugging, and developing practical software solutions. Interested in building reliable, scalable, and maintainable applications while continuously learning new technologies.

## SKILLS

**Programming Languages:** Python, Java.
**Web Technologies:** HTML, CSS, JavaScript.
**Databases:** MySQL.
**IoT & Hardware:** Arduino Uno, Raspberry Pi, Sensors.
**Tools:** VS Code, Git.

## PROJECTS

**Web Application for Shopping** November 2025
Tech Stack: HTML / CSS / JavaScript / MySQL

- Developed a web-based shopping application with functionality for product browsing, cart management, checkout, and order placement.
- Implemented application logic for product selection, cart operations, order processing, and order confirmation.
- Integrated MySQL database operations to store and manage product, customer, payment, and order information.
- Designed persistent order storage to maintain transaction and customer data after successful checkout.

**Smart Health Monitoring System** June 2024
Tech Stack: Arduino Uno / C / Sensors / IoT

- Developed a sensor-based system for real-time collection and monitoring of health-related data.
- Integrated multiple sensors with Arduino Uno to collect and process health parameters.
- Implemented monitoring logic to identify abnormal sensor readings and support early detection of potential issues.

**Smart Train Maintenance System** May 2025
Tech Stack: Raspberry Pi / Python / IoT / Sensors

- Developed a Python-based IoT application using Raspberry Pi for real-time monitoring of train and track conditions.
- Integrated sensor data collection and processing to identify potential maintenance-related issues.
- Implemented monitoring logic to support early fault detection and preventive maintenance.
- Designed the system to provide continuous data monitoring for improved railway maintenance efficiency and safety.

## EDUCATION

**Bachelor of Technology in Computer Engineering - AIML**, Presidency University, Bangalore 2023 – Present
**GPA:** 6.46/10

**Intermediate**, Oxford Junior College, Narasaraopet, Andhra Pradesh 2021 – 2023
**Percentage:** 75%

**SSC**, Blue Bells Public School, Atchampet, Andhra Pradesh 2020 – 2021
**Percentage:** 100%

## INTERNSHIP & CERTIFICATIONS

**Python Developer Intern — StaxTech** June 2025 - July 2025

- Developed a **Scientific Calculator** and **Rock-Paper-Scissors game** using Python, applying functions, loops, conditional statements, user input, and game logic.

**Python for Beginners** – Scaler April 2025
